"No, I won't tell her." .It was the mystery that Nolan had sensed the first time he saw her staring at him across the village compound three days ago. At first he thought she was one of the company people?somebody's wife, daughter, sister. That afternoon, when he returned to the bungalow, he caught her staring at him again at the edge of the clearing. So he asked Moises who she was, and Moises didn't know. Apparently she'd just arrived a day or two before, paddling a crude catamaran downriver from somewhere out of the denser jungle stretching a thousand miles beyond. She had no English, and according to Moises, she didn't speak Spanish or Portuguese either. All the NASA people were wrong. The Astronaut Corps fought like crazy to keep you off this trip. Time enough for that on later flights. We were blinded by our loyalty to the test-pilot philosophy of space flight. We wanted as few scientists as possible and as many astronauts as we could manage. We don't like to think of ourselves as ferry-boat pilots. I think we demonstrated during Apollo that we could handle science jobs as well as anyone. We saw you as a kind of insult, a slap in the face by the scientists in Houston to show us how low our stock has fallen." .she could pick up the hem, her left hand stiffened..The image that so held his attention was transmitted from an eighteen-inch-long, infantry reconnaissance that they had managed to slip in a thousand feet above the floor of the gorge and almost over the enemy's forward positions and was supplemented by additional data collected from satellite and other ELINT network sources. The display showed the target command bunker at the bottom of the gorge, known enemy weapons emplacements as computed from backplots of radar-tracked shell trajectories, and the locations of observation and fire command posts from source analysis triangulations of stray reflections from control lasers. On it the cool water of the stream and its tributaries stood out as black lines forking like twigs; the rock crags and boulders were shades of blue; living vegetation varied from rust brown on the hills to deep red where it crowded together along the lower slopes of the gorge; and shell and bomb scars glowed from dull orange to yellow depending on how recently the explosions had occurred..She smiled at them and said, "I am glad you have come for the second piece of the mirror, but it is buried in this frozen shard of ice. Once, when I was a girl, I chopped through a chunk of ice to get to an earring my mother bad dropped the night before in a winter dance. That block of ice was the coldest and hardest ice any man or woman had ever seen. This block is ten degrees colder. Can you chop through it?" .Maybe it's me, but I don't think I'm handling the stim console badly. If I were, the nameless tech would be on my ass over the com circuit.It isn't the realists who find life dreadful. It's the romancers. After all, which group is trying to escape from life? Reality is horrible and wonderful, disappointing and ecstatic, beautiful and ugly. Reality is everything. Reality is what there is. Only the hopelessly insensitive find reality so pleasant as to never want to get away from it But pain-killers can be bad for the health, and even if they were not, I am damned if anyone will make me say that the newest fad in analgesics is equivalent to the illumination, which is the other thing (besides pleasure) art ought to provide. Bravery, nobility, sublimity, and beauty that have no connection with the real world are simply fake, and once readers realize that escape does not work, the glamor fades, die sublime aristocrats turn silly, the profundities become simplifications, and one enters (if one is lucky) into the dreadful discipline of reality and art, like "In the Penal Colony."
