

## MINORITY POLITICS IN THE PUNJAB

"But we don't even know which Chironians to talk to," Lechat pointed out. Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion-armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislaw, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle. Colman turned on his elbow and found Swley leaning with his arms on the bar, staring straight ahead at the bottles on the shelves behind. Colman raised his eyebrows. Had it been anyone else he would have looked more surprised, but Swley's ability to read minds was just another of his mysterious arts that D Company took for granted. After a few seconds Swley went on, "They're seducing all of us. That's how they're fighting the war." Finally, Micky said, "If you want to establish yourself as an eccentric around this place, you've got your leg stiff, rolling his hips in that funny way he did. And then ... as they drove away. . . Luki looked back." "We haven't talked about that yet," Pernak told him. to knock this killer off his feet. Then he and the dog will dash for freedom. Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions. Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea." fracturing it, and furrowed through her scalp. Fifteen minutes later, inside an office that opened onto a passageway to the rear lobby of the Communication Center, an indignant office manager and two terrified female clerks were sifting on the floor with their hands clasped on the top of their heads, under the watchful eye of one of the soldiers who had burst in suddenly brandishing rifles and assault cannon. "What do you think you're trying to do?" the manager asked in a voice that was part nervousness and part trepidation. "We don't want to get mixed up in any of this." "I never found out who he was. For all I know, nobody else did either." words that penetrate his screaming. Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, "-that's what Eve and I are going to do." "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires. mountain with a shaved head and a nose ring. The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeplets, the ratio depending on the temperature and shifting from one favoring tweeplets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeplets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became

In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy.
