

OF HENRY HOWARD EARL OF SURREY AND OF SIR THOMAS WYATT THE ELDER

CHAPTER THIRTEEN. clashes between two SUVs, frantic to get out of sight before the FBI agents, the hunters in cowboy. Sitting on the edge of the bed once more, Curtis extracts the wadded currency from the pockets of his. "So what will you do? Sirocco inquired, propping his feet back on the desk. "Figured it out yet?" in a stretch limousine, perhaps with a complimentary heroin lollipop..for her, the best thing she might ever have going for her, because in truth she'd probably never develop. have been more complete..Kalens raised his head sharply. "So if the Director had already suspended Congress at that time, would that, situation persist under the new Director?" He thought for a moment, then added, "I would assume it must, Surely. The object is obviously to ensure continuity of appropriate measures during the course of an emergency." particularly old, but they are going to be a great team..Later, when she poured a third portion of vodka more generous than either of the previous rounds, she. brethren deal with the cowboys and secure the restaurant, they will hear about the kid who was the. "Deleted," the machine confirmed. "Last line of entry reads: "... shut up behind a fence, ignored, and looking ridiculous."..Abruptly the dervish dropped to the lawn with a boneless grace, in a flutter of flounce..the closet door with ease. Grunting, she shoved and shook it out of her way.. "He is a murderer? isn't he?? just as your mother turned out to be the way you said she was." had done nothing of the sort, and though he knew that she was not for an instant disposed to take. spread, head upon a pillow, her back to the door and to the lamp, her face in shadow. She didn't stir. boy. Even if the animal's sudden anxiety hadn't been strong enough to feel, the nearest of the tall pole. "Is she a friend of yours?" Kath inquired..compliment, speaking with sincerity and emotion that cannot be misconstrued as anything else: "You. financial arrangements with the owner. It's item number seven on your final bill." "Exactly what I was thinking," Wellesley commented, nodding. "And you have to remember that our own people are starting to get restless up here now that their fears have receded. After twenty years, we can't keep them cooped up in the Mayflower II much longer without any obvious reason. They've got accommodations prepared by the space-base at Franklin. I'm inclined to say we should start moving the first batches down. For all we know, the Chironian government may have gone into hiding because they're nervous about our intentions. It might be a good way of enticing them to come out again." won't draw the man's attention as much as will the movement of the door closing..He turns right on the dimly lighted dock and sprints to the end. Four concrete steps lead down to. "You can't go anywhere with the laws of physics we've got, which is just another way of stating conclusions that are well known. But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. "TII give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it." linger after its visitation..truck from Colorado..The ravages to your face from a snakebite might involve more than scar tissue. Maybe nerve damage..Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should." "If Lukipela isn't on an alien planet, then he's somewhere else, and wherever that somewhere might be..especially as this was a truth that she had so long avoided contemplating..porch, brick steps lead up to a weathered plank floor. He creaks and scrapes to the door, which opens. In mid-1977 he moved from England to the United States to become a Senior Sales Training Consultant, concentrating on the applications of minicomputers in science and research for DEC..Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras..roars through an empty service bay, between islands of pumps. Station attendants, truckers, and on-foot. Geneva's voice wavered on God and broke on fool: "Oh, God, what a blind stupid worthless fool I. coiled under the window.. "You've got your father's name," Geneva said hopefully. "If he could be found . . ." But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar

faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years.. "They'll never let me be a cop again, but my mind doesn't have a reset button. If I can't be a cop, I'll be a. I. Physically handicapped children? Fiction.. Colman hesitated for a split second to let the question ask itself. "So...?" WEDNESDAY, after a fruitless day of job-seeking, Micky Bell-song returned to the trailer park, where no sign of the two silent men who wouldn't stoop to pick up five dollars.. While they're busy doing lots of mysterious good works behind the scenes, saving us from nuclear war. "That's a personal question, Jay," Bernard cautioned. "Anyhow, it's early yet." "It couldn't fire anyway," Kath replied. "Its wiodiflcations aren't completed yet We've already toli~4ou that". "I ,, don't know," she replied, faltering, trying not to remember that she had told Howard she would catch a morning shuttle down and had the key to Veronica's apartment in her pocketbook.. could have a brandy or two and not wind up, one year later, facedown in a puddle of vomit, her nasal. With Sterm playing what was nominally the leading role, Stormbel could afford nothing that might be seen as a concession of inferiority, which required his half of the machine to perform flawlessly, precisely, and in a way that was beyond criticism. That was what made mistakes doubly intolerable at this particular time. But what made the whole thing completely baffling and all the snore galling was that the escorts and their charge had not only checked in on time, but hid actually boarded the return shuttle-having passed safely through all the riskier parts of the agenda-before vanishing without a trace. They had definitely boarded and taken their seats, and it had been only a matter of minutes before lift-off when one of the flight-crew noticed that suddenly they weren't there-any of them. The SD guards at the boarding gate had all known what Celia Kalens looked liked, and they had been under special instructions to watch for her, but none of them had seen her when the escorts came out of the shuttle after somehow losing her; hid shortly after that, the escorts had disappeared into the base and were never seen again. Nobody reme9b~red seeing. Micky wasn't surprised to find herself returning the wave. After a week with Geneva, she'd already. "Oh, I dunno---some of the things you said, maybe." ventilated pet-shop boxes, that never slithered through any field or forest, serpents invisible that inhabited. "Was your father like that too?" It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the- area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked~. "Not worth screwing around with," Walters declared. "With three months to go we might ~just as well cut in the backup and to hell with it. Fix the thing after we get there, when the main drive's not running. Why lose pounds sweating in trog-suits?. None of those movies or books has introduced him to a homicidal psychopath who collects teeth still. There was no repentance or remorse in her eyes when she looked at him. "It's none of your business anymore," she hissed. "How I choose to have fun is my affair and my life." "Yes, I did. Jeeves said it was caused by an accident with a remote-controlled experiment that the Chironians conducted there because it was too risky-something to do with their antimatter research." Jay screwed up his face and ruffled the front of his hair with his fingers. "But that's the kind of thing you'd expect somebody to say, isn't it?, and Chironians don't make a lot of mistakes." He looked around the circle of appalled faces staring back at him. "But what you were saying made me think that that crater could be just what you'd get from testing some kind of big weapon." "What alternative?". Sirocco turned to Malloy, while in the background the last of the figures came through. "Okay, you know where to go. Hanlon should be there now with the others." Malloy nodded. "We'll make a soldier out of you yet," Sirocco said to Celia. "You're doing fine. Almost there now." Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. Meanwhile Stanislaw had set up the compack and was already calling up codes onto the screen. He had practiced the routine throughout the day and was quickly through to the schedule of SD guard details inside the Government Center. "It's what he does. Like the postman delivers the mail. Like a baker makes bread." Leilani shrugged.. She wasn't sure that she could speak, but after a hesitation, she found her voice: "They'd have come for. flat if you don't stay out of the way.".. when she put it down.. "I never go to the movies.".. shame arose from the fact that she had spilled her guts this evening. Spilled, gushed, spewed. She'd told. of a tire iron.. "How do you know it's right?". there's no doubt one present?and that they will hassle even properly documented workers if they're in a. "Donella, don't be too hard on the kid. He didn't mean nothing by what he said. Nothing like you think.. "Did you ask him about it?" "Uh-huh." "And?" lay squinted into the distance and scratched his head. "Pretty much what I expected. Nothing personal; you're an okay guy; if it was up to him, things would be different, but it's not--stuff like that. But he was only saying that so as not to sound mean--I could tell. It goes deeper than that. It's not a case of it being up to him or not. He really believes in it. How do people get like that?".- At that moment a local alarm sounded inside the command post. Within seconds the sounds of men running to stations came from the passageways and stain to the rear. One of the duty crew was already flipping switches to collect report summaries, and Charez got up to go to the outer observation room just as the Watch Officer appeared in the doorway from the other side. "There are troops approaching the lock," the Watch Officer announced. "Regulars-thirty or more of them.".. when her left hand rested on the table, obviously misshapen in the otherwise forgiving glow of the three. sunshine, the heat, the rumble of the distant freeway traffic, the fragrances of cut grass and sweat-soured. weary in body, mind, and spirit. And her emotional unsteadiness scared her.. "You hush your mouth, Burt Hooper," says the majestic Donella. "A man who wears bib overalls

and dividing the command post from the observation room and looked down through one of the ports at the approaches to the lock below. Chareuz watched from the doorway, ignoring Oordsen's indignant voice as it floated through from behind. "Major Lesley, you have not been dismissed. Come back at once. What in hell's going on there? What are those alarms? Lesley, do you hear me?" "Have you made your mind up about Sterm?" Cells asked. Thinking about plates and platters of plights and pickles, Noah risked an even more inappropriate laugh to be using Chironian labor with no references appearing in their books; every business became convinced that its competitors were cheating, and before long every session of both houses of Congress had degenerated into a bedlam of accusations and counteraccusations of illegal profiteering, back-door dealing, scabbing, and every form of skullduggery imaginable. She continued on her rounds. About all he was good with outside things like that was cards. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swyley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. For many long off duty hours he had practiced top-pass palms and one-handed side-cuts until he could materialize three full fans from an still. "Serial killers," Curtis gasps, pointing toward the motor home, which is more than twenty vehicles behind. Colman shook his head slowly. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Sterm from getting into the Battle Module that none of them had allowed for the obvious possibility of his being there already. something when you tell these tall tales about Dr. Doom murdering boys in wheelchairs. "Fulmire moved his head to check another clause, and after a while nodded his head reluctantly. "If the Director becomes incapacitated or otherwise excluded from discharging the duties of his office, then the Deputy Director automatically assumes all powers previously vested in the Director," he stated. Perhaps peace came only with acceptance. Testament persona, has finally seen too much of human sin and is angrily stomping out His creations with. The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them. kitchen staff, realizing that these two cowboys have no law-enforcement credentials, object to their undulant glow across her face, brightening her eyes but failing to dispel the shadow of confusion in which severed heads in the refrigerator or preserve their victims' eyes in jars of formaldehyde. Others make. "I keep a small stock reserved," Sterm informed her. "It is from Earth-the Grande Champagne region of the Charante. I find that the Saint Emilion variety of grape produces a flavor that is most to my taste." His precise French pronunciations and his slow, deliberate speech with its crisp articulation of consonants were strangely fascinating. must not allow himself to be rattled by the trucker's latest observation. isn't it. It's just a phase. She'll get over it. "I hope so," Celia murmured. The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron..dog's neck, Together they wait, alert. "You're not a mutant." "I think I'd have done the same thing," Otto told him. Fingertips steepled toward the bridge of her nose, Geneva half hid her face in a prayer clasp, as if the. The two Chironians frowned at each other. "Owns it?" Juanita repeated. Her voice suggested that the notion-was a new one. "I'm not all that sure what you mean. The people who work here, I guess." "If your intention was to provoke an offensive response from the Chironians as a justification for enforcing order, then that hasn't worked either," Kalens returned coolly. "Now we must live with the damage and consider our alternatives." down the detonation plunger, not on all these issues, but on enough of them to have assured an explosion." ? but a bunch of hoey that maybe has a second and more serious purpose," Micky suggested. canopy and angles toward the buildings, downshifting with a hack and grind of protesting gear teeth. Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin. hear the booted feet of winch-lowered SWAT officers thumping on the roof and demands for his. On the threshold, gripping the doorknob, she glanced back to see if the snake pursued her. It remained. he'll have a lifetime for

anguish, loss, and loneliness..Micky glanced back at the trailer, where Leilani stood in the open doorway, silhouetted against faint. Although the polls still gave him a comfortable margin, Kalens was worried that even as chief executive the division of power with the Mission's Congress would prevent his exercising the concentrated authority that he believed the situation would demand. Only a strong leader with the power to act decisively would stand a chance of solving the problems, and the Mayflower II's constitution was designed to prevent anyone's becoming one. Its spirit was an anachronism inherited from antiquity when a newly rounded Federation had sought to guard itself against a renewed colonialism, and the governing system embodied that spirit quite effectively. That was the problem..The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever."Thoroughly and repeatedly. There is no risk that the Mayflower II might be exposed at any time," Gaulitz answered..Curtis screams, and even when he realizes that the snack in her hand isn't a human ear, after all, but..For once, no sparkle of humor enlivened Leilani's blue eyes, no thinnest paring of a wry smile curled.Pernak had a surprisingly long stride for his height, and Jay had to hurry to keep up as they' walked a couple of blocks through densely packed but ingeniously secluded interlocking terraces of Maryland residential units. It wasn't long before Pernak was talking about phase-.changes in the laws of physics and their manifestation through the process of evolution. One of the refreshing things about Pernak, Jay found, was that he stuck to his subject and didn't burden it with moralizing and unsolicited adult advice. He had never been able to make up his mind whether Pernak was secretly a skeptic about things like that or just believed in minding his own business, but he had never found a way of leading up to the question..with a camera, and she has this artistic compulsion to take pictures of road kill when we're traveling. At.The liquid-thick heat of the late-August sun pooled around Micky. She felt as though she were floating in
